Water safety courses are for water treatment plant professionals, water supply planners and experts, public servants, employees of the mining industry and people hoping to build a career in the water industry. Courses are arranged in cooperation with the Savonia University of Applied Sciences, the National Institute for Health and Welfare (THL) and the Geological Survey of Finland (GTK)

The course will provide you with

- the opportunity to improve your expertise in water safety on a comprehensive basis
- up-to-date and practical information
- training under the guidance of experts in the sector

Where and how?

- the course content can be tailored to the needs of the customer
- participants can choose the training package they prefer
